Vehicle Import Guide

Vehicle importation rules are specific and can change. This guide lists the questions and steps to settle first — please speak to SHEHEN before you buy or ship a vehicle.

Before you buy

- ☐ Confirm with SHEHEN that the vehicle you have in mind can be imported and cleared under current requirements.
- ☐ Check rules that commonly affect vehicles — such as age, condition, standards and inspection — for the current position.
- ☐ Ask for an estimate of shipping, duties, taxes and clearance costs before you commit.

Details to have ready

- ☐ Make, model, year and chassis / identification number
- ☐ Purchase invoice and seller details
- ☐ Origin country and loading port
- ☐ Export or de-registration paperwork from the origin country, where applicable

Shipping and clearance

- 1 Choose a shipping method with SHEHEN (for example roll-on/roll-off or container).
- 2 Send the vehicle and shipping documents to SHEHEN as soon as they are available.
- 3 SHEHEN coordinates port arrival and customs clearance.
- 4 Collect or arrange delivery once the vehicle is released.
- 5 Complete any registration steps that apply after clearance.
